The Promotion is operated by 8TECH SVG LTD.

2. Promotion Period

The Promotion runs from **August 5, 2026 at 12:00 PM (UTC)** until **September 2, 2026 at 12:00 PM (UTC)**, inclusive.

3. Eligibility

3.1. The Promotion is open to SimpleFX clients who meet any of the following conditions:

- are new users making their first-ever deposit,
- are existing users making the first deposit on a trading account that has not yet received any deposits,
- open a new trading account and make a first deposit to it.

3.2. Each verified client (profile) may receive the bonus for the first deposit once per trading account. All trading accounts must belong to the same verified client profile.

3.3. The bonus will be granted according to the deposit amount (see section 6).

4. Nature of the Bonus

4.1. The bonus is granted in the form of non-withdrawable trading credit added to the trading account balance.

4.2. While the bonus itself cannot be withdrawn directly, it can be used for trading, and profits generated from trading with the bonus can be withdrawn without restrictions, subject to SimpleFX's general Terms of Service.

4.3. The bonus effectively increases the client's margin on the account, thereby enhancing their trading capacity.

4.4. The bonus is awarded via the existing First Deposit Bonus (FDB) system; no additional action is required from the client. No new technical implementation is required.

5. Bonus Allocation

5.1. The bonus is added automatically to the trading account within a maximum of 3 business days from the time the qualifying deposit is confirmed.

5.2. The bonus is applied only to the specific account where the deposit was made.

6. Bonus Structure

The bonus amount depends on the value of the qualifying deposit as per the table below:

Deposit Amount (USD)	Bonus Amount (USD)
≥ \$20	\$10
≥ \$50	\$25
≥ \$100	\$50
≥ \$250	\$125
≥ \$500	\$250
≥ \$2,000	\$1,200
≥ \$10,000	\$6,000
≥ \$25,000	\$10,000

For currencies other than USD, amounts are converted to the USD equivalent based on SimpleFX's internal daily fixing rate applicable on the date the deposit is credited. SimpleFX does not charge a separate conversion fee for the purposes of calculating the bonus; however, the internal fixing rate may differ from the live market rate at the time of the deposit.

7. Bonus Redemption (Cashback Conversion)

7.1. The bonus is gradually converted into withdrawable balance through a spread cashback mechanism based on trading volume.

7.2. Cashback is calculated daily and converted automatically into withdrawable funds at a 10% rate of spread turnover.

Example: \$50 spread turnover = \$5 cashback

8. Bonus Forfeiture

8.1. If a client withdraws funds or initiates an internal transfer from the account before the bonus is fully redeemed, the remaining bonus amount is forfeited.

8.2. This may lead to a lower margin level and can result in automatic closure of open positions (margin call), as the bonus forms part of the trading margin on the account.

9. Bonus Expiry

9.1. The bonus expires 180 days after being credited to the account if not fully redeemed via trading.

9.2. Clients will be notified by email 7 days before the bonus expires.
